

RECYCLING YOUR LAPTOP & VAPE BATTERIES HERE WILL DIRECTLY HELP REFUGEES IN NORTHERN FRANCE

Follow us on social media for more information about our work @charitableroots

What's the first thing you'd grab if you were forced to flee home?

DONATION STATION

how can you help refugees?

Roots creates ingenious solutions to the ongoing problem of affordable energy for those on the move. We **recycle dead and dying batteries** (18650 lithium ion), found in a multitude of rechargeable objects (laptops, vapes, power tools, pushbikes, electrical vehicles) and **turn them into power banks for refugees** in Northern France to keep their phones charged

A phone is not only where family photos and contacts are kept, it also provides access to vital aid including food, clothes, shelter and medical care when displaced.

We turn these...

...into these...

...using these!

PLEASE DONATE YOUR OLD LAPTOP & VAPE BATTERIES HERE. THANKS!
