

RECYCLING YOUR LAPTOP BATTERIES HERE
WILL DIRECTLY HELP REFUGEES IN NORTHERN FRANCE

What's the first thing you'd grab if you were forced to flee home?

how can you help refugees?

A phone is not only where family photos and contacts are kept, it also provides access to vital aid including food, clothes, shelter and medical care when displaced.

We turn these...

...into these...

...using these!

Follow us on social media for more information about our work

DONATION STATION

Roots creates ingenious solutions to the ongoing problem of affordable energy for those on the move. We recycle dead and dying batteries (18650 lithium ion), found in a multitude of rechargeable objects, (most commonly laptops, vapes, electrical vehicles) and turn them into power banks for refugees in Northern France to keep their phones charged

PLEASE DONATE YOUR OLD LAPTOP BATTERIES HERE. THANKS!
